

Have you had a stroke and have difficulty speaking and/or understanding words (*aphasia*)?

RECEIVED
Human Subjects Division

OCT 03 2014

Purpose of research study: Examine the link between ^{UW} short-term memory and language in aphasia

To be included in this study: You must meet the following criteria:

- Have aphasia (difficulty speaking and/or understanding speech) following a stroke
- Speak fluent English
- 30-75 years of age

APPROVED

JAN 20 2015

UW Human Subjects
Review Committee

Time commitment: Approximately 4 hours spread across multiple sessions (2-4 sessions).

Location of research study: The study will take place at the University of Washington. If you are unable to travel, this study can take place in your home.

Potential benefits: Information gained from this study may improve diagnosis and treatment of aphasia.
