

Have you had a STROKE?

Do you still have difficulty using one arm and hand?

You may qualify for a University of Washington Research Study attempting to improve your ability to use your hand

If you fit the following description, contact:

Cecille Corsilles-Sy, OTR/L
(206) 744-8320
cecesy@u.washington.edu*

- Between 18 to 84 years of age
- Had a stroke at least 6 months ago
- Not currently receiving occupational therapy (OT) or physical therapy (PT)
- Can stand and walk around without the help of another person
- Can read, speak, and understand English

This research study will trial a new treatment technique that focuses on using both hands in daily activities, at home and in the community.

This treatment requires participation of *at least* 2 hours a day, 3 days a week for 4 weeks or a total of 24 hours.

To learn more about this study please contact:
